DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-2 and 8 are indefinite because the claim is misdescriptive. Applicant claims a feedback circuit for providing a control signal according to the charging voltage. However from the examiner's review of the drawings and the specification the feedback circuit appears to correspond to a node that does not affect any change on the charging voltage. If applicant disagrees with this interpretation, then applicant should explain to the examiner what circuitry corresponds to the feedback circuit and what is the feedback circuit doing to the charging voltage to change it into a control signal? In addition, the applicant refers to "two transmit ends" with respect to the feedback control module; however, in the specification applicant uses the term transition ends. Are these equivalent terms? Perhaps either the term used in the specification or the term used in the claims should be changed to correspond with the other.

Claim 3 is indefinite because the claim is misdescriptive. Is the "another transmit end" a third transmit end or is it one of the two transmit ends described in the base claim 1? The claim is unclear.

Claim 7 is indefinite because the claim is misdescriptive. It is not clear to the examiner how the feedback circuit is able to stop the transmission of the current between the two transmit ends. It is the examiner's belief that it is not the feedback circuit that transmits the current between the two transmit ends, but rather it is the feedback control module.

Correction or clarification is required.

Claims 4-7 are also rejected due to the limitations of the base claim and any intervening claims.

Applicant is hereby advised that any changes made to the independent claim may require changes in the dependent claims to maintain consistency and avoid possible antecedent basis problems.
